SCI-FI Northern Camps and School Workshops

SCI-FI Science Camps is a non-profit organization that operates various programs that promote science and engineering to children through science camps, clubs and workshops. In 2012, SCI-FI brought its enthusiasm to over 12,000 Saskatchewan youth.

Since 2002, SCI-FI has delivered science and technology programming to communities in northern Saskatchewan. In 2012 this included school workshops in La Ronge as well as week-long science camps in Wollaston Lake, Fond du Lac, La Ronge, Black Lake and Stony Rapids.

Why was this program put in place?

SCI-FI, founded in 1989, has always been dedicated to providing hands-on science to all Saskatchewan youth. The purpose of our northern programming is the same as our Saskatoon programming, to inspire Saskatchewan’s youth towards pursuing higher education in sciences and engineering. Our Northern Outreach programming has been made possible by a long term partnership with Cameco, Areva, the Athabasca Health Authority as well as the CAPES program (Cameco Access Program for Engineering and Science).

Northern Program Sponsors

SCI-FI is a proud member of Actua.

Actua provides training, resources and support to a national network of local organizations offering science, technology, engineering and mathematics (STEM) education programs. Actua members reach over 200,000 youth per year. Please visit Actua on the web at www.actua.ca
